Fidelity Checklist for Mand Training

Steps	Date:	Date:	Date:	Date:	Date:
1. Creates an environment rich in reinforcing items and contrives EOs.					
2. Confirms that the MO is present for the target item.					
3. Prompts the target mand when MO is confirmed using the appropriate prompt level.					
4. Fades prompts appropriately.					
5. Differentially reinforces more independent responding.					
6. Completes error correction when errors are made.					
7. Intersperses mastered mands and other types of programs.					
8. Collects data accurately.					
9. Maintains high MOs by varying the reinforcer, stopping the use of a reinforcer before it loses value, varies the method of reinforcer delivery and presents mand trials on a variable schedule.
